	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Priority

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chen et al in view of Hoang.

Chen et al disclose applicants' basic inventive concept, a Stirling cycle refrigerator which uses heat pipes which traverse fins which are parallel to the airflow to transfer heat from the hot side heat exchanger and to the cold side heat exchanger (figures 2

Application/Control Number: 10/521,350

Art Unit: 3744

and 15), with the heat pipes using capillary material to transfer the liquid (figure 17), substantially as claimed with the exception of using a loop heat exchanger heat pipe with a porous member, with vapor conduits outside of the porous member between the porous member and the wall of the annular conduit. Hoang shows this feature to be old in the heat pipe art, with the condensation of the refrigerant providing the motive force for moving the vapor and forming a vacuum over at the outlet of the capillary tubes to provide liquid motion through the capillary material. It would have been obvious to one of ordinary skill in the art at the time of applicants' invention from the teaching of Hoang to modify the Stirling cooler of Chen et al by using a capillary pump heat transfer system to improve the heat transfer from the Stirling cooler with no external energy requirement.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Lai et al shows a heat pipe with inner and outer annular chambers. Malaker shows a Stirling cooler with heat pipes with porous material to transfer heat.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William C. Doerrler whose telephone number is (571) 272-4807. The examiner can normally be reached on Monday-Friday 6:30-4:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Cheryl Tyler can be reached on (571) 272-4834. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
